

Dear \_\_\_\_\_:

I am an Indiana voter who strongly opposes the so-called "right-to-work (for LESS)" proposals under consideration by the Indiana Legislature. This proposal has nothing to do with job creation and is plain and simple a tactic of Union-busting. Not one of the 22 states with "right to work" laws has average annual pay above the national average.

In these states, "right to work (for LESS)" has also:

- Lower average wages by more than \$5,000 a year.
- Raise the number of people living in poverty by 15 percent
- Increase the rate of workplace deaths by 51 percent.

We have so many issues that need immediate attention in Indiana that attacking Union members and their ability to earn decent wages and benefits is not one of them. I look forward to hearing your position on this anti-worker issue.

Sincerely,
