

October 15
International Day of Action

FATIGUE
KILLS

Fatigue Kills. That's why the Teamsters union and truck driver unions in over 70 countries have chosen today to demand speedier border crossings, pay for waiting time, and quicker turnarounds at ports and railheads.

Whether the issue is responding to terrorist threats, high fuel costs, or overcrowded terminals...too often the truck drivers are forced to shoulder the burden.

Deaths on the highway are up. And everyone knows that exhaustion is the culprit in too many of these accidents.

We must fight industry attempts to force drivers to work longer hours. **We must demand more efficient border crossings, and more pay – not less – when drivers are forced to wait.**
